PAPER - II

Section - A

Mid Sem: 10

End Sem : 40

SOCIAL WORK RESEARCH

Unit - I Social Work Research

Science: Meaning and assumptions, scientific approach in comparison to the native or common sense approach. Scientific attitude; Scientific method; application of scientific method for the study of social phenomena.

Research: Definition and objectives, Social Work Research: Meaning, objectives, functions and limitations, Scope, ethics in research.

Problem identification: Concepts, variables, conceptual and operational definitions, Criteria for the selection of research problem; Problem formulation.

Methods of research: Meaning, importance, uses and requirements. Survey research, case study, action and evaluative research, Theory of causality.

Unit-II Research Design

Research Design: Meaning, importance, types, research plan and research project; Random observation, exploratory, formulative, analytical, descriptive and experiments design, Pilot Study.

Hypothesis: Meaning, importance, characteristics of good hypothesis, distinction between hypothesis, assumption, theory, law, principles and axioms, concepts construction and operational working definitions.

Sample Design:- Meaning, universe, population, sample size, sampling error, types and methods; probability and non-probability.

Tools Design: Baseline study; assessment of intervention effects/impact. Brief mention of tools and techniques of data collection, analysis. Statistical techniques as an aid to analysis.

Unit- III Sources and Types of Data:

Primary and secondary sources: quantitative and qualitative data, use of secondary data; Official data, personal documents, problem in the use of secondary data

Methods of Collection of Primary Data: Observation, Structured and unstructured; participant and non-participant Questionnaire, interview schedule and interview guide pilot study and pre-testing.

Scales: Need for scales; sociometry scales, Psychometric scales.

Issues: Interpretation of data, research reporting_contents of research report: foot-note, references, bibliography, preparation of abstract; the art of making book review.

Section - B

Mid Sem: 10

End Sem : 40

SOCIAL STATISTICS**Unit-I Meaning and Scope:**

Meaning, importance, method, scope; functions and limitations, levels of measurement. Editing; coding and classification of data, preparation of master tables (key) 'and analysis, frequency distribution, tabular, diagrammatic and graphic presentation of data. Sample space and events, probability measure and probability space, random variable as a measurable function, distribution function of a random variable, discrete and continuous-type random variable. probability mass function, probability density function,

Unit-II Measures of Central Tendency, Dispersion and Association:

Concepts of average arithmetic mean, median, mode, relative advantages and limitations. Range, quartile deviation, standard deviation, standard score. Linear regression spearman and karl pearson coefficient of contingency.

Unit-III Testing of Hypothesis and Statistical Analysis:

Meaning and elements, chi-square test of hypothesis. Index numbers, time series and. Methods of standardization of scales and tests, Z-scores, standard scores, T-scores, percentile scores, intelligence quotient and its measurement and uses, validity of test scores and its determination, use of factor analysis and path analysis in psychometry.
